Angular Developer

Want to make a positive and meaningful impact? Then come be a part of iN2L. iN2L is an innovative leader in the world of technology for seniors and we are revolutionizing the senior living industry

iN2L's engagement systems have opened up possibilities for tens of thousands of residents in senior living communities across the country. Using the latest technologies, iN2L breaks down barriers and enables seniors, including those with memory loss, to share their world with caregivers and family members. iN2L is proven to increase quality of life by reducing loneliness, boredom, psychotropic drug use and more. A simple press of a button on our touch screens can launch hundreds of applications for recreation, social connection, memory care engagement and therapy programs.

We bring the world to seniors.

THE OPPORTUNITY:

As a developer at iN2L you'll be working with a small team of other software engineers in an agile software development process to add features and maintain the iN2L platforms, games and other content. We work in a highly collaborative setting to address the top priorities each sprint for our internal and external customers. We use tools including Git and JIRA to organize our work, and strive to create working software on a frequent basis that can be tested and released regularly. We aim to automate integration and deployment to provide fast feedback on the work we're doing and minimize the amount of manual effort required for testing and release. Our process is continuing to evolve and we look for developers that are willing to help make the team better and take ownership of the product, the work and the process.

Successful Candidates will have:

    3 years of experience in Javascript software development and API/web service
    development
    Can design, build, and maintain efficient, reusable, and reliable Angular code
    In Depth knowledge of HTML5/CSS, JSON], and Angular 2.
    Ability to work both collaboratively and independently
    Intermediate knowledge of Couchbase or other NoSQL document storage databases
    Experience with integrating third-party APIs and Web Services
    Working knowledge of the general web application landscape, architectures, trends, and
    emerging technologies
    Experience with Agile development, preferably Scrum, and Unit Testing / TDD
    Experience with Jenkins for Continuous Integration/Continuous Deployment
    BA/BS degree or higher in a technical discipline

Highly Desired:

    Familiarity with concepts of RESTful service development

Working knowledge of Ruby on Rails

We offer:
Competitive Salaries
Flexible schedules
Fun working environment
Fantastic team of people collaborating together
Virtual Reality Center
401k plan with company matching
Medical/Dental/Vision Benefits
The opportunity to make a positive and meaningful impact to improve our customer's lives.

"I go to work every day knowing that my efforts are going to make a meaningful difference in someone's life. I have the pleasure of working with a talented group of highly dedicated and self-motivated individuals who care deeply about the company and the people we serve." iN2L employee
